

TABLE OF CONTENTS

Foreword.....	7
List of symbols.....	8
1. Basic components of hydraulic systems.....	9
1.1. Introduction.....	9
1.2. Hydraulic pumps and motors.....	15
1.2.1. Fundamentals of hydraulic pumps.....	15
1.2.2. Types and designs of displacement pumps.....	24
1.2.3. Fundamentals of hydraulic motors.....	27
1.2.4. Types and designs of hydraulic motors.....	28
1.3. Hydraulic cylinders.....	30
1.3.1. Fundamentals of hydraulic cylinders.....	30
1.3.2. Types and designs of hydraulic cylinders.....	33
1.4. Valves.....	36
1.5. Directional control valves.....	37
1.6. Joysticks, ways of controlling work attachments.....	40
1.7. Accumulators.....	42
1.7.1. Fundamentals of hydraulic accumulators.....	42
1.7.2. Types and designs of accumulators.....	44
1.8. Oil filters.....	45
1.9. Oil coolers.....	46
1.10. Quick release couplings.....	46
1.11. Hydraulic lines.....	47
1.12. Oil tanks.....	49
2. Overview of basic hydraulic drive systems.....	50
2.1. Introduction.....	50
2.2. Hydrokinetic drive.....	52
2.3. Hydrostatic drive.....	56
2.3.1. Wheeled undercarriage.....	57
2.3.2. Tracked undercarriage.....	60
2.3.3. Track sets.....	61
2.3.4. Road and railway machines.....	61
2.4. Control systems used in working machinery.....	62
2.5. Steering systems of wheeled vehicles.....	64

2.6. Excavator body rotation mechanism.....	66
2.7. Other drivetrains – hybrid systems	67
3. Design of hydrostatic systems in working machines	70
3.1. Introduction.....	70
3.2. Open hydraulic circuit	75
3.3. Closed hydraulic circuit.....	76
3.4. Constant power system	77
3.5. Single pump control systems	78
4. Systems of cooperation between hydraulic cylinders and working attachments	82
4.1. General informations about kinematic systems used in construction machinery equipment..	82
4.2. Elementary crank mechanism.....	85
4.3. Lever mechanism.....	93
4.3.1. Introduction	93
4.3.2. Determination of geometric relationships for the lever mechanism	94
4.3.3. Determination of angle γ as a function of cylinder length l	95
4.3.4. Determination of the bucket angular velocity ω_3 as a function of the cylinder length	96
4.3.5. Determination of forces and moments of forces in the lever mechanism	98
5. Selected control systems of working machinery attachments	100
5.1. Introduction.....	100
5.2. Loader attachment control system with floating bucket function.....	100
5.3. Hydraulic system for fan drive with variable direction of rotation	105
5.4. Hydraulic diesel engine control (DHC).....	106
5.5. Protection of the hydraulic line against pressure jumps caused by a sudden impact of the cylinder on an obstacle.....	106
6. Hydrostatic system maintenance.....	107
6.1. Introduction.....	107
6.2. Unloading of the hydrostatic system	107
6.3. Deaeration of the hydrostatic system.....	108
6.4. Oils used in the hydraulic systems of machines	108
6.5. Replacement of hydraulic lines.....	113
6.6. Maintenance of hydraulic systems.....	114
6.7. Examples of defects in hydraulic pumps	116
Conclusions.....	118
References.....	119
