PREFACE	7
Acknowledgements	9
Dariusz Nowak, Iskra Panteleeva	
1. THE NATURE OF THE INDUSTRIAL ENTERPRISE	11
1.1. Introduction	12
1.2. Concept of an industrial enterprise	12
1.3. The features of industrial enterprises	21
1.4. Goals and tasks of an industrial enterprise	25
1.5. Company functions	28
1.6. Typology of the industrial enterprises	32
1.7. The features of industrial market	39
Aneta Deneva, Iskra Panteleeva	
2. THE OPERATIONAL MANAGEMENT EVOLUTION AND ITS ROLE IN THE INDUSTRIAL ENTERPRISE	49
2.1. Introduction	50
2.2. Definition of operational management	53
2.3. Levels of operational management	55
2.4. The principles of operational management	59
2.5. Production systems and its elements	61
2.6. Organization of the production process (best practices)	65
Bartosz Marcinkowski	
3. FUNCTIONS AND ROLES IN OPERATIONS MANAGEMENT	73
3.1. Introduction	74
3.2. Organization of production processes	74
3.3. Enterprise Resource Planning	77
3.4. Purchasing management	82
3.5. Production capacity	87
3.6. Inter-organizational cooperation	90

Aneta Deneva, Sebastian Narojczyk	
4. TRADITIONAL METHODS USED IN OPERATIONAL ACTIVITIES	99
4.1. Introduction	100
4.2. Benchmarking	100
4.3. Outsourcing	106
4.4. Core competencies	111
4.5. Just-In-Time (JIT)	115
4.6. Material Requirements Planning (MRP or MRP I)	119
4.7. Manufacturing Resources Planning (MRP II)	122
4.8. Total Quality Management (TQM)	123
4.9. <i>Kaizen</i>	129
Bartosz Marcinkowski, Sebastian Narojczyk, Dariusz Nowak, Vasyl Zalizko	
5. MODERN METHODS USED IN PRODUCTION-OPERATIONS MANAGEMENT	137
5.1. Introduction	138
5.2. Shop Floor Control	139
5.3. Cooperative manufacturing	141
5.4. Environment-conscious manufacturing (ECM) and life-cycle assessment (LCA)	144
5.5. Waste management and recycling	147
5.6. Electronic Data Interchange (EDI)	149
5.7. Virtual enterprise	153
5.8. World Class Manufacturing (WCM)	155
5.9. Quality Function Deployment (QFD) and House of Quality (HOQ)	158
5.10. Theory of constraints (TOC)	161
5.11. Drum Buffer Rope (DBR)	163
5.12. Group technology (GT) and cellular manufacturing (CM)	165
5.13. Demand Chain Management (DCM)	166
5.14. Competitive intelligence (CI)	168
5.15. Statistical Process Control (SPC) and Computer-Aided Process Planning (CAPP)	171
Natalia Mazur, Dariusz Nowak, Vasyl Zalizko	
6. PROBLEMS OF SUSTAINABLE DEVELOPMENT AND CHALLENGES RELATED TO PRODUCTION AND OPERATIONS MANAGEMENT	183
6.1. Introduction	184
6.2. Environmental changes	186
6.2.1. Depletion of natural resources	187
6.2.2. Fossil fuels and global warming	189
6.2.3. Waste, air, water and land pollution	192
6.2.4. Problems related to environmental pollution	197
6.3. Globalization in operation activities	198
6.4. Technical progress in production-operation management	205

Contents

6.5. The impact of innovation on production and operation activities	211
6.6. Qualifications, competences and human capital in the production- operation processes	217
