

Contents

1. Introduction	7
1.1. Deaf and hard-of-hearing people	7
1.2. Deaf sports	8
1.3. Deaf football	12
1.4. Football in scientific research	16
1.5. Studies in deaf people's physical fitness	21
2. The rationale of the present research	33
2.1. The study aim	35
2.2. Research hypotheses	35
2.3. Research questions	35
3. Material, methods, and study design	37
3.1. Ethics committee approval	37
3.2. Participants	37
3.2.1. Tested group	39
3.2.2. Reference groups	39
3.3. Research methods	39
3.3.1. Morphological examinations	39
3.3.2. Motor skills examinations	41
3.4. Research design	43
3.5. Statistical methods	44
4. Results	47
4.1. Laterality of the lower limbs	47
4.2. The level of hearing loss in the studied groups	47

4.3. Age and training experience in the studied groups	48
4.4. Body height, body mass, and body mass index	48
4.5. Muscle mass and fat mass	50
4.6. Body circumferences	53
4.7. Results of motor skills examinations	54
4.7.1. Lower limb strength abilities in isokinetic conditions	54
4.7.2. Lower limb strength abilities in static conditions (isometric mode)	70
4.7.3. Lower limb strength abilities during vertical jumps	74
4.7.4. Speed abilities	77
5. Discussion	79
5.1. Introduction	79
5.2. Level of hearing loss	79
5.3. Body height and body composition	80
5.4. Body circumferences	81
5.5. Lower limb strength abilities in isokinetic and isometric conditions	82
5.6. Lower limb strength abilities during vertical jumps	88
5.7. Speed abilities	90
6. Summary	93
Conclusions	99
