

TABLE OF CONTENTS

1. INTRODUCTION	7
Acknowledgements	10
2. METHODS	11
2.1. Plant sampling	11
2.2. Methods of environmental testing	12
2.3. Statistical analysis	13
3. VEGETATION STRUCTURE	18
3.1. Frequency and species abundance	18
3.2. Diversity of vegetation	28
3.3. Macrophyte communities	33
3.3.1. The <i>Sphagnum denticulatum</i> – <i>Warnstorfia exannulata</i> community	33
3.3.2. The <i>Isoëtes lacustris</i> – <i>Lobelia dortmanna</i> – <i>Littorella uniflora</i> community	36
3.3.3. The <i>Myriophyllum alterniflorum</i> – <i>Littorella uniflora</i> community	42
3.3.4. The <i>Chara delicatula</i> – <i>Drepanocladus sordidus</i> community	46
3.3.5. The <i>Fontinalis antipyretica</i> – <i>Drepanocladus sordidus</i> community	50
3.3.6. The <i>Myriophyllum alterniflorum</i> – <i>Chara delicatula</i> community	55
3.3.7. The <i>Elodea canadensis</i> community	59
3.3.8. The <i>Ceratophyllum demersum</i> community	64
3.3.9. The <i>Myriophyllum spicatum</i> community	68
3.3.10. The <i>Nitella flexilis</i> community	73
3.3.11. The <i>Chara globularis</i> community	76
3.3.12. The <i>Chara tomentosa</i> community	80
3.4. Comparative analysis of the communities	86
4. FACTORS AND REGULATORS	97
4.1. Relationships between environmental factors, communities and their toposequence	97
4.2. The rank of environmental factors	107
5. DISCUSSION	143
5.1. Abiotic regulators	143

5.1.1. Light intensity	143
5.1.2. Temperature	145
5.1.3. Nutrients	148
5.1.4. Dissolved inorganic carbon	149
5.1.5. Organic matter in the water	154
5.1.6. Sediment as a regulator	155
5.1.7. Water depth, hydrodynamic forces and human pressure	156
5.2. Biotic regulators of vegetation structure	158
5.3. Relationships among regulators	160
6. CONCLUSIONS	163
7. REFERENCES	165
8. SUMMARY (in Polish)	182
9. APPENDIX	197
