<b>1. Structure of matter and basic laws of chemistry .....</b>	<b>13</b>
<i>Zbigniew Szklarz</i>	
1.1. Introduction .....	13
1.2. Basic concepts of chemistry .....	14
1.3. Structure of matter .....	17
1.3.1. Structure of atom .....	17
1.3.2. Periodic table of elements (PTE) .....	25
1.3.3. Structure of molecule and chemical bonds .....	27
1.4. Basic laws of chemistry .....	35
Literature .....	36
<b>2. Classification of the chemical elements .....</b>	<b>37</b>
<i>Urszula Lelek-Borkowska, Maria Starowicz</i>	
2.1. Chemical elements .....	37
2.1.1. Periodic table of elements .....	37
2.1.2. Electron blocks in periodic table .....	39
2.1.3. Periodic trends in chemical properties of elements .....	40
2.1.4. General characteristic of metals .....	43
2.1.5. General characteristic of non-metals .....	43
2.1.6. General characteristic of semi-metals .....	44
2.2. Hydrogen .....	45
2.2.1. General characteristics .....	45
2.2.2. Physical properties .....	45
2.2.3. Chemical properties .....	46
2.2.4. Production .....	46
2.2.5. Compounds .....	47
2.2.6. Application .....	48
2.3. Alkali metals (lithium family) .....	49
2.3.1. General characteristics .....	49

2.3.2. Physical properties .....	49
2.3.3. Chemical properties.....	50
2.3.4. Production .....	51
2.3.5. Compounds and application .....	51
2.4. Alkaline earth metals (beryllium family) .....	52
2.4.1. General characteristics .....	52
2.4.2. Physical properties .....	52
2.4.3. Chemical properties.....	53
2.4.4. Production .....	54
2.4.5. Compounds and application .....	54
2.5. Boron family .....	55
2.5.1. General characteristics .....	55
2.5.2. Physical properties .....	56
2.5.3. Chemical properties.....	56
2.5.4. Production .....	57
2.5.5. Compounds and application .....	58
2.6. Carbon family .....	59
2.6.1. General characteristics .....	59
2.6.2. Physical properties .....	59
2.6.3. Chemical properties.....	61
2.6.4. Production .....	62
2.6.5. Compounds and application .....	63
2.7. Nitrogen family .....	65
2.7.1. General characteristics .....	65
2.7.2. Physical properties .....	65
2.7.3. Chemical properties.....	67
2.7.4. Production .....	67
2.7.5. Compounds and application .....	67
2.8. Oxygen family .....	68
2.8.1. General characteristics .....	68
2.8.2. Physical properties .....	70
2.8.3. Chemical properties.....	70
2.8.4. Production .....	70
2.8.5. Compounds and application .....	71
2.9. Halogen (fluorine family).....	72
2.9.1. General characteristics .....	72
2.9.2. Physical properties .....	72
2.9.3. Chemical properties.....	73

2.9.4. Production .....	73
2.9.5. Compounds and application .....	74
2.10. Noble gases (helium family) .....	74
2.10.1. General characteristics .....	74
2.10.2. Physical properties .....	75
2.10.3. Chemical properties .....	75
2.10.4. Production .....	76
2.10.5. Compounds and application .....	76
2.11. D-block elements .....	76
2.11.1. General characteristics .....	76
2.11.2. Variable oxidation stages .....	78
2.11.3. Formation of complex ions .....	79
2.11.4. Colored ion formation .....	79
2.11.5. Preparation of transition metal .....	80
2.11.6. Scandium family .....	80
2.11.7. Titanium family .....	81
2.11.8. Vanadium family .....	82
2.11.9. Chromium family .....	83
2.11.10. Manganese family .....	83
2.11.11. Iron triad (Groups 8, 9, 10) .....	84
2.11.12. Platinum group elements (PGEs) .....	87
2.11.13. Copper family .....	87
2.11.14. Zinc family .....	88
2.12. F-block elements .....	89
Literature .....	90
<b>3. Classification of inorganic compounds and types of chemical reactions .....</b>	<b>91</b>
<i>Maria Starowicz</i>	
3.1. Classification of inorganic compounds .....	91
3.1.1. Oxides .....	92
3.1.2. Hydrides .....	97
3.1.3. Hydroxides (bases) .....	99
3.1.4. Acids .....	101
3.1.5. Salts .....	104
3.2. Types of chemical reactions .....	109
3.2.1. Synthesis reaction (combination reaction) .....	109
3.2.2. Decomposition reaction .....	109
3.2.3. Replacement reaction .....	109

3.2.4. Red-ox reaction .....	110
3.2.5. Other criteria for classification of chemical reactions .....	113
Literature .....	115
<b>4. Basic calculations in chemistry .....</b>	<b>116</b>
<i>Bartosz Gryszakowski</i>	
4.1. Stoichiometry and chemical reaction balancing .....	116
4.1.1. Redox reactions .....	126
4.1.2. Composition of compounds .....	142
4.1.3. Calculations based on chemical reaction equations .....	147
4.2. Compositions of mixtures and solutions .....	151
4.2.1. Concentration and dilution .....	159
4.2.2. Reactions in solutions .....	166
4.3. Basic calculations in thermochemistry .....	170
4.3.1. Hess's law .....	172
4.3.2. Kirchoff's law .....	176
<b>5. States of matter .....</b>	<b>182</b>
<i>Alicja Łukaszczyk</i>	
5.1. General properties of gases and liquids .....	182
5.2. Densities of liquids, solid bodies, and gases .....	184
5.3. Application of density measurements .....	185
5.4. Gaseous state .....	185
5.4.1. The ideal gas law .....	185
5.4.2. Boyle–Mariotte law .....	187
5.4.3. Gay-Lussac's law .....	188
5.4.4. The ideal gas law .....	192
5.4.5. Molar gas constant R .....	193
5.4.6. Dalton's law .....	194
5.4.7. Diffusion of gases .....	197
5.4.8. Kinetic energy of gas molecules .....	198
5.4.9. Ideal gas energy .....	199
5.4.10. Real gases .....	200
5.5. Liquid state .....	202
5.5.1. Surface tension .....	202
5.5.2. Liquid viscosity .....	203
5.6. General characteristics of solids .....	205
5.6.1. Geometric classification of solids .....	205

5.6.2. Electronic classification of solids .....	205
5.6.3. Crystal system .....	206
5.7. Liquid crystals .....	208
Literature .....	209
<b>6. Chemical kinetics and statics .....</b>	<b>210</b>
<i>Dominika Święch</i>	
6.1. Chemical kinetics .....	210
6.1.1. Microscopic theory of chemical reaction kinetics .....	210
6.1.2. Definition of reaction rates (speed of reaction) and rate laws .....	212
6.1.3. Determination of relationship between reactant concentration and time .....	214
6.1.4. Half-life of reactions .....	218
6.1.5. Reaction mechanism and rate law for elementary reaction steps .....	218
6.1.6. Factors affecting reaction rate .....	220
6.2. Chemical statics .....	224
6.2.1. Chemical equilibrium and equilibrium constant .....	224
6.2.2. Homogenous and heterogeneous equilibria .....	225
6.2.3. Le Châtelier's principle .....	228
Literature .....	233
<b>7. Chemistry of solutions .....</b>	<b>234</b>
<i>Urszula Lelek-Borkowska</i>	
7.1. Solutions .....	234
7.1.1. Types of mixtures – definitions .....	234
7.1.2. Formation of solutions .....	236
7.1.3. Solubility .....	237
7.2. Expressions of solution content .....	238
7.2.1. Mass (weight) percent .....	238
7.2.2. Volume percent .....	239
7.2.3. Molar concentration .....	239
7.2.4. Normal concentration .....	240
7.2.5. Molarity .....	242
7.2.6. Molar fraction (mole fraction) .....	243
7.3. Ideal and real solutions .....	244
7.3.1. Activity .....	245
7.3.2. Henry's law .....	245
7.3.3. Raoult's law .....	246

7.3.4. Distillation, rectification .....	248
7.3.5. Cryoscopic and ebullioscopic effects .....	248
7.3.6. Diffusion, Fick's law .....	249
7.3.7. Osmosis .....	250
7.4. Water and water solutions .....	251
7.4.1. Electrolytes .....	252
7.4.2. Dissociation, hydration, conductivity of ions .....	253
7.4.3. Degree of dissociation, strength of electrolytes .....	254
7.4.4. Dissociation constant .....	255
7.4.5. Ostwald's dilution law .....	257
7.4.6. Solubility product .....	257
7.4.7. Conductivity .....	258
7.5. Acids and bases .....	259
7.5.1. Definitions of acids and bases .....	260
7.5.2. Arrhenius definition .....	260
7.5.3. Theory of Brønsted and Lowry .....	261
7.5.4. Lewis's theory .....	261
7.5.5. Summary of acid-base theories .....	262
7.5.6. Determination of acidity .....	263
7.5.7. Acidity, pH concept, measuring of pH .....	263
7.5.8. Neutralization, titration .....	267
7.5.9. Hydrolysis .....	268
7.5.10. Buffers .....	270
7.6. Hardness of water .....	271
7.6.1. Expressions of water hardness .....	272
7.6.2. Removal of hardness (softening of water) .....	273
7.6.3. Distillation .....	273
7.6.4. Thermal method .....	273
7.6.5. Chemical methods .....	274
7.6.6. Physico-chemical methods .....	275
<b>8. Electrochemistry .....</b>	<b>277</b>
<i>Halina Krawiec</i>	
8.1. Oxidation – reduction reactions (redox reactions) .....	277
8.2. Electrochemical reactions .....	278
8.3. Electrochemical equilibrium .....	279
8.3.1. Electrochemical potential .....	279
8.3.2. Kinetics of electrochemical reaction, equilibrium, exchange current, Nernst Equation .....	280

8.4. Measurements of electrode potential, reference electrodes .....	283
8.5. Galvanic series .....	284
8.6. Galvanic cells .....	286
8.6.1. Galvanic cells – examples .....	288
8.6.2. Alkaline batteries .....	288
8.6.3. Lead-acid battery: $\text{Pb} \text{PbO}_2 \text{H}_2\text{SO}_4, \text{H}_2\text{O} \text{PbSO}_4 \text{Pb}$ .....	289
8.6.4. Fuel cells .....	290
8.7. Electrolysis. Application of electrolysis .....	293
8.7.1. Laws of electrolysis .....	294
8.7.2. Application of electrolysis in industry .....	294
8.7.2.1. Electrolysis of molten sodium chloride .....	294
8.7.2.2. Extraction of aluminum by electrolysis .....	295
8.7.2.3. Silver electroplating .....	296
Literature .....	297
<b>9. Corrosion and corrosion protection .....</b>	<b>298</b>
<i>Halina Krawiec</i>	
9.1. Introduction .....	298
9.2. Electrochemical corrosion .....	299
9.2.1. Anodic and cathodic reactions .....	300
9.2.2. Electrode potential .....	301
9.2.3. Corrosion rate .....	302
9.2.4. Types of corrosion cells .....	302
9.2.5. Corrosion of iron and steel, formation of rust – example .....	303
9.2.6. Types of corrosion .....	304
9.2.7. Protection from corrosion .....	309
9.3. High-temperature corrosion (dry corrosion, HTC) .....	318
Literature .....	320
<b>10. Organic chemistry .....</b>	<b>321</b>
<i>Edyta Proniewicz</i>	
10.1. Introduction .....	321
10.2. Nomenclature .....	321
10.3. Properties .....	325
10.3.1. Isomerism .....	326
10.3.2. Atom order .....	328
10.4. Hybridization .....	329
10.5. Classification .....	332
10.5.1. Hydrocarbons .....	332
10.5.1.1. General properties .....	332
10.5.1.2. Isomers .....	334

10.5.1.3. Alkanes .....	334
10.5.1.4. Alkenes .....	335
10.5.1.5. Alkynes .....	336
10.5.1.6. Cyclohydrocarbons .....	337
10.5.1.7. Arenes .....	338
10.5.2. Halogenated hydrocarbons .....	339
10.5.3. Hydrocarbon derivatives .....	340
10.5.3.1. Amines .....	340
10.5.3.2. Alcohols .....	342
10.5.3.3. Ethers .....	343
10.5.3.4. Carbonyl compounds .....	345
10.5.4. Carbohydrates .....	352
10.5.5. Nucleic acids .....	356
10.5.6. Amino acids, peptides, and proteins .....	357
Literature .....	360
<b>11. Polymers .....</b>	<b>361</b>
<i>Gaetano Palumbo</i>	
11.1. Introduction .....	361
11.2. Classification .....	362
11.3. Polymerization .....	368
11.4. Addition polymerization (chain-growth) .....	369
11.5. Condensation polymerization (step-growth) .....	373
11.6. Amorphous and crystalline classification .....	375
11.7. Mechanical property of polymers .....	378
11.8. Effect of temperature .....	384
Literature .....	395
